Coloplast

Together to Care
- Innovative Surgical Solutions

Introduction

With a world class innovative spirit and the ultimate objective of always being able to make your life easier, Coloplast presents its latest dedicated Urology Care catalogue including all of our disposables and implants for urology and gynaecology.

For over 120 years, we have supported the medical progress through the development of the latest techniques and devices in co-operation with our leading surgeon partners.

Our know-how and high quality industrial processes permit us to offer you medical materials of the very highest standards with worldwide recognition and expertise.

Within this catalogue you will find all of the latest products you will need for your daily operating practice:

- Endourology : A wide range of disposable products for stone management like Dormia stone extractors, Ureteral stents, Access sheath (Retrace) and guidewires. We have extended our line with a new innovative digital solution to remove ureteral stents in one step: ISIRIS α . The product is a combination between a single use flexible cystoscope with an integrated grasper and a reusable portable device
- Female Pelvic Health: slings (*Altis*, *Aris*), and lightweight meshes (*Restorelle*), to treat stress urinary incontinence and pelvic organ prolapses.
- Men's Health: male sling (*Virtue*), inflatable penile implants (*Titan Touch*), as well as malleable implants (*Genesis*) to treat erectile dysfunction.
- General Surgery: a wide range of drains and a high quality suction/irrigation device for laparoscopy (*Elefant*).
- Lower Urology: all disposable surgical devices required for handling Prostate disorders, from the diagnosis biopsy (*Cobra*) to the treatment -prostatic catheters, (*X-Flow*, *Prostaflow*), bladder evacuator (*Easivac*), post operative bags (*Cysto-Care*); and also addressing bladder and suprapubic drainage, urethral strictures, voiding dysfunctions, Bladder Outflow Obstruction and other urological conditions (*Cystodrain*).

Coloplast is exceedingly proud to provide you with the highest level of services, products and guarantees.

Customer Service and Sales representatives are available whenever you need them, to help you find the right solutions to your specific requirements.

Synopsis

UROLOGY

- 1 • Endourology
- 2 • Percutaneous access
- 3 • Urinary Diversion
- 4 • Connectors and spigot
- 5 • Lower urinary tract
- 6 • Organ procurement

PROSTHESIS

- 1 • Penile prosthesis
- 2 • Ancillaries
- 3 • Male sling

URODYNAMICS

- 1 • Urethrocystometry
- 2 • Cystometry
- 3 • Urethral pressure
- 4 • Abdominal pressure
- 5 • Line and accessories

FEMALE PELVIC HEALTH

- 1 • Urinary incontinence
- 2 • Pelvic organ prolapse
- 3 • Gynaecology

SURGERY

- 1 • Laparoscopic surgery
- 2 • Surgical drainage
- 3 • Pezzer - Malécot catheters
- 4 • Digestive surgery
- 5 • Miscellaneous
- 6 • Biliary stone extractors

Urology

1 • Endourology

1.1.	Stone extractors	6
1.2.	Access sheaths	10
1.3.	Irrigation line	11

Dormia No-Tip

Titane nickel (Nitinol) • 4 twisted wires.

- Individually packaged • Sterile • Detachable handle.

REF.	Ch/Fr	Length	Basket size
EXN434	3	90cm	14mm

Designed for semi-rigid and rigid ureteroscopy.

Titane nickel (Nitinol) • 4 round wires.

- Individually packaged • Sterile • Detachable handle.

REF.	Ch/Fr	Length	Basket size
EXN734	2.2	120cm	11mm
EXN934	1.5	120cm	9mm

Designed for flexible, semi-rigid and rigid ureteroscopy.

Supplied with a waterproof connector (Tuohy-Borst).

Dormia N.stone

Titane nickel (Nitinol) • 4 helical wires.

- Individually packaged • Sterile • Detachable handle.

HiLine Irrigation line

Designed to control irrigation and increase visibility during ureteroscopy.

- Anti-reflux valve to prevent backflow.
- Removable tubing extension to allow pump manipulation by surgeons or assistants.
- Luer-Lock connection suitable for use with all brands of endoscopes.
- **Box of 10** • Sterile.

REF.

AK7000

ImaJin Silicone double loop ureteral stents

The remarkable biocompatibility and flexibility of silicone makes it the material of choice for long-term implantation : improved patient comfort and less incrustation material.
Duration of implantation: 12 months.

- **Kit composition:** each stent is supplied in a set with a pusher (simple or steerable) and with or without a guidewire depending on the model.
Ø Guide: 0.035".
Steerable pusher: with or without radiopaque ring.
- **Individually packaged** (with a guidewire) • Sterile.
- **Box of 5** (without a guidewire) • Sterile.

1.4. Double loop ureteral stents

Biosoft duo

Multi-length Hydro-Coated ureteral stents

Produced by coextrusion of a flexible material and a rigid material, Biosoft duo was designed for easy insertion, while retaining great flexibility for the patient comfort.

Duration of implantation: 12 months.

- **Kit composition:** each stent is supplied in a set with a pusher (simple or steerable) and a guidewire.
Ø Guide: 0.035".
Steerable pusher: with or without radiopaque ring.
- **Individually packaged** • Sterile.

Sets with simple pusher

2 • PERCUTANEOUS ACCESS

2.3. Direct puncture

Set with J catheter

Percutaneous set. Each component of the kit is supplied in the same peel pouch.

- **Kit composition:**
 - Chiba needle 18G.
 - Seldinger guidewire 0.038".
 - 1 set of dilators depending on the catheter size.
 - Vortek J catheter with a metal stylet (29cm).
- **Box of 5** • Sterile.

Ch/Fr	6	8	10	12	14
REF.	RJE106	RJE108	RJE110	RJE112	RJE114

Direct puncture percutaneous nephrostomy sets

Direct puncture set with Vortek catheter and trocar needle.

- **Kit composition:**
 - Vortek J catheter (29cm).
 - Trocar needle 19G.
 - Universal bag connector.
 - Locking sleeve.
- **Individually packaged** • Sterile.

Ch/Fr	8	10
REF.	RJD108	RJD110

In-Ka, high pressure nephrostomy balloon catheters

PET balloon allowing an inflation pressure up to 17 ATM for effective and uniform dilatation of tissues throughout the length of the duct wall. Compatible with a 0.038" guidewire.

- **Kit composition:** each In-Ka catheter is supplied with an Amplatz sheath and with or without an inflation device depending on the model.
- **Individually packaged** • Sterile.

5 • LOWER URINARY TRACT

5.4. Prostatic and urethral stents

Diabolo

Stent for reversible sphincterotomy in patients with Detrusor Sphincter Dyssynergia.

- Tight coils: no tissue ingrowth - easily removable.
- Wide base: reduced risk of migration.
- Large internal diameter: good drainage of urine.
- Ancillary.
- **Individually packaged** • Sterile.

Diabolo	Material: Phynox
REF.	AE2101

Insertion kit

BoNee

Needle for bladder injection.

- For Injection inside the bladder muscle.
- Short tip (4 mm).
- 22G needle, 5Ch/Fr.
- Protection cap on the needle tip.

- Pointer stop: Reduce the bladder perforation risk.
- Flexible body.
- Box of 1 or 5 • Sterile.

Length	Use	Box of 1	Box of 5
35 cm	With rigid cystoscope	NBI035	BBI035
70 cm	With both flexible and rigid cystoscope	NBI070	BBI070

22G needle, 5 Ch/Fr, 4mm tip.

5 • LOWER URINARY TRACT

5.6. Prostate biopsy

Cobra

Single use biopsy gun. Makes multiple biopsies easier.

- 19 mm long notch.
- 26 mm stroke.
- **Box of 10** • Sterile.

2-lumen catheter, straight, Dantec-type catheter.

Length of body: 35 cm • Total length: 55 cm • Paediatric use	
Ch/Fr	6
REF.	AH5406

2-lumen catheter, straight.

2.5 cm between the urethral eye and the bladder eye.

1 • URETHROCYSTOMETRY

Semi-rigid PVC.

Proximal Luer-lock tips colour-marked to make it easy to connect to urodynamics system.

Blue = Bladder • Red = Urethra • Transparent = Filling.

Centimetre markings to mark position of catheter in urethra.

- Box of 10 • Single use • Sterile.

Length of body: 40 cm • Total length: 56 cm	
Ch/Fr	10
REF.	AH2309

3-lumen catheter, straight

Length of body: 40 cm • Total length: 160 cm	
Ch/Fr	10
REF.	AH9309

3-lumen catheter, straight

Length of body: 40 cm • Total length: 55 cm	
Ch/Fr	8
REF.	AH2108

2-lumen catheter, straight.

Length of body: 40 cm • Total length: 163 cm	
Ch/Fr	8
REF.	AH9208

2-lumen catheter, straight.

	Female catheter	Male catheter
Ch/Fr	8	9
Length of body (cm)	16	42
Total length (cm)	37	57
REF.	AH24F8	AH24M9

2-lumen catheter, straight, 4 urethral eyes for filling or measurement (multi-point catheter).

Cystometry

Soft Neoplex.

Proximal Luer tips colour-marked to make it easy to connect to urodynamics system.

Blue = Bladder • Black = Filling.

Stoppers to close off unused lumens.

Centimeter markings to mark position of the catheter in the urethra.

X-Ray visible material.

- **Box of 5** • Reusable • Sterile.

Length of body: 35 cm • Total length: 55 cm	
Ch/Fr	10
REF.	AH5010

2-lumen catheter. Reusable.

Length of body: 35 cm • Total length: 57 cm	
Ch/Fr	12
REF.	AH5212

2-lumen catheter, latex balloon 10 ml. Single use.

Semi-rigid PVC.

Proximal Luer-lock tips colour-marked to make it easy to connect to urodynamics system. Stoppers to close off unused lumens.

Centimeter markings to mark position of catheter in urethra.

- **Box of 5** • Single use • Sterile.

Length of body: 41 cm • Total length: 65 cm	
Ch/Fr	12
REF.	AH4212

2-lumen catheter, coudé.

Pressure flow rate

Polyurethane.

- Box of 10
- Single use
- Sterile.

Length of body: 40 cm	
Ch/Fr	8
REF.	AH5908

J catheter, 2-lumen. Stylet for catheter placement.

Abdominal pressure

Disposable.

- AH31: Proximal Luer tip.
- AH48 / AH47: Stoppers to close off unused lumens.
- **Single use** • Sterile.

Length: 150 cm • Material: PVC • Box of 10		
	Latex balloon	Latex free
Ch/Fr	10	10
REF.	AH3110	AH3111

Catheter, single lumen, 3 ml balloon.

Length: 33,5 cm • Material: Neoplex • Box of 5		
	Latex balloon	Latex free
Ch/Fr	10	10
REF.	AH4810	AH4811

2-lumen catheter, 3 ml balloon.

Length: 26,7 cm • Material: PVC and Latex • Box of 5	
Ch/Fr	22
REF.	AH4722

2-lumen catheter, latex balloon.

Lines and accessories

Lines and accessories that can fit urodynamic devices.

- Single use • Sterile.

Perfusion line

Material: PVC, PC, ABS, PE • Length: 200 cm • Box of 10

REF.

AH1222

Perfusion line 2-lumen, with spike with protective cap and roller clamp.

Filling line

Material: PVC, Silicone, ABS, PE • Length: approx. 3.3 meter • Box of 10

REF.

AH111M

Non-return valve

Material: PVC, ABS, PE • Tube Length: 10 cm • Total Length: 14,2 cm
• Box of 60 units (20 x 3)

REF.

AH1303

Female Pelvic Health

1 • Urinary incontinence	104
2 • Pelvic organ prolapse	107
3 • Gynaecology	110

Aris & Supris Full-length slings

Mid-urethral slings to treat female stress urinary incontinence.
Designed for predictable accurate placement and tensioning.
Transobturator and retropubic routes.

- Made from knitted, monofilament polypropylene.
- Lightweight, macroporous with low elasticity.
- **Individually packaged or kitted**
- Sterile.

Aris sling	
REF.	UR3101

Single use Aris trans-obturator sling system Aris sling + helical and flat curved tunnellers	
REF.	UR3105

Helical tunnellers reusable	
REF.	TU3100

Flat curved tunneler reusable	
REF.	TU3001

Long tunneler • Obese patients reusable	
REF.	TU3003

Single use Supris retropubic sling system + retropubic tunnelers	
REF. Supris sling	519560

Altis single-incision sling system

Transobturator placement with a single incision approach.

- Sling material based on the Aris & Supris sling.
- Helical type tunneller leads anchor placement.
- Support for patient with urethral hypermobility and intrinsic sphincter deficiency.
- Static and dynamic anchors allow intra-operative adjustability.
- Sold as a kit.
- Sterile.

Altis	
Altis single-incision sling + single use helical tunnellers	
REF.	519650

Restorelle ●

Restorelle mesh

Restorelle Smartmesh is designed in a full array of customized shapes and flat grafts specifically designed for pelvic floor repair procedures.

- Ultralight weight mesh — 19 g/m².
- Uniform macro and interstitial pores.
- **Individually packaged** • Sterile.

For transvaginal repair

Restorelle single-incision meshes	
Restorelle Direct Fix Anterior	501450
Restorelle Direct Fix Posterior	501460

Restorelle
Direct Fix Anterior

Restorelle
Direct Fix Posterior

For trans-abdominal repair

Restorelle Y mesh	
Restorelle Y - 24cm x 4cm	501420
Restorelle Y-XL - 27cm x 4cm	501430

For customization based on physician preference

Restorelle flat meshes	
Restorelle M Flat Mesh - 15cm x 10cm	501320
Restorelle L Flat Mesh - 24cm x 8cm	501440
Restorelle XL Flat Mesh - 30cm x 30cm	501330

Digitex suture delivery device

This single incision transvaginal system delivers a suture to the operative site, when direct visualization or anatomical location is difficult to access.

The device assists in suturing by passing a needle through the tissue to capture the suture ligation.

- Single use.
- Sterile.

Flexishaft™ Reaches Deep Pelvic Structures

- Safely position multi-directional device head
15 degrees when direct visualization or anatomical location is difficult to access.
- Comfortable and ergonomic handle.

3 • PELVIC ORGAN PROLAPSE

SutureSmart™ System for Procedural Efficiency

- «Smooth suture cap placement and preloaded eliminates unnecessary OR set-up time»
- Cartridge contains crescent needle for procedural convenience.

	Packaging	Part number
Digitex Suture Delivery Device	4 individually packaged per box	52025
0 Nonabsorbable monofilament polypropylene sutures with NSH taper point crescent needle	12 individually packaged per box	52026
2-0 Nonabsorbable monofilament polypropylene sutures with NSH taper point crescent needle	12 individually packaged per box	52027
0 Absorbable PDO Sutures with NSH taper point crescent needle	12 individually packaged per box	52030

Guarantee and conditions of use

Without prejudice to your legal guarantee against all the consequences of defects or hidden defects, our guarantee shall apply under the following conditions:

The duration of the normal guarantee of the equipment against any manufacturing defects or malfunctions, and against any other defects in materials shall be a maximum of six months from the date of delivery, with the onus being on the Purchaser to prove the said defects or malfunctions.

The Company's guarantee shall be strictly limited to the equipment supplied and shall have as its sole effect the repair or replacement at the Company's expense and in its workshops of all those parts rendered unusable as a result of defects or malfunctions. Parts replaced free of charge shall remain the property of the Company.

The guarantee shall not apply to replacements or repairs resulting from normal wear and tear of the devices, to deterioration or accidents due to negligence, to any failure to respect the storage or sterilization conditions, or to any failure to monitor, maintain or use the devices correctly.

The guarantee shall not extend to any consequential damage that may result from using a device that has a manufacturing defect. No compensation shall be payable by way of damages for any reason whatsoever. The storage conditions of the equipment shall be the sole responsibility of the Purchaser. We recommend that the products be stored in their original packaging with this packaging intact, away from light in a dry place, and at an ambient temperature.

The fact that an item is mentioned in this catalogue does not necessarily mean that it can be supplied. Committed to continually improving product quality, Coloplast reserves the right to make changes at any time, without notice, to its items, their specifications, packaging and presence in its range.

The purchase or use of our products implies acceptance of the general conditions of sale set out in the price list.

Material used

Coloplast uses various types of raw materials, depending on the various diagnostic or therapeutic indications for its devices.

The biocompatibility of the medical devices is in accordance to EN ISO 10993-1: 2009 + AC 2010 standard.

Before being used in manufacturing, raw materials are controlled in our laboratories batch by batch, using the control methods defined by our internal procedure.

All materials and components used by Coloplast are controlled and used in accordance with procedures and the requirements of standard EN ISO 13485: 2012 + AC: 2012

The manufacturing processes depend on the material and include extrusion, injection or compression-molding, assembly and soaking.

We use three main types of material:

- Silicones
- Latex
- Thermoplastics: Vortek®, Biosoft®Duo, Neoplex, Polyamide, PVC and Polyurethane.

SILICONE: this is a flexible material with optimum biocompatibility. Silicone comes in different degrees of rigidity; it may be transparent, may contain radiopaque lines and may be opaque to X-rays.

After use, it degrades only to silica (sand) and water, with no chlorine or carbon derivatives. It is very stable over time.

VORTEK: an original formulation designed by Coloplast. The material is biocompatible; it comes in different degrees of rigidity and is opaque to X-rays. Mastery of the co-extrusion of this material has made it possible to produce dual-hardness JJs which are rigid in contact with a guide wire to facilitate glide and assembly, while having a flexible exterior for patient comfort.

BIOSOFT DUO: a flexible biocompatible polymer which is particularly well tolerated by patients.

NEOPLEX: a specific formulation developed by Coloplast based on PVC and plasticizer.

Its behavior over a long period of time is remarkable.

POLYAMIDE (PA): particularly rigid material suitable for accessories such as funnels, tips, sheaths, etc.

POLYPROPYLENE (PP): is a synthetic material made of macromolecules. It is low density and exhibits excellent mechanical properties over time, with a high level of chemical inertness and biocompatibility.

POLYVINYLCHLORIDE (PVC): a transparent polymer which may contain radiopaque lines and/or pigments.

It has been used for many years for the manufacture of various medical devices.

POLYURETHANE (PU): a material which does not contain plasticizer and which is very resistant, and with different range of elasticity available.

LATEX: a natural latex compound stabilised by vulcanisers and by hardeners used to induce rigidity; it comes in various degrees of hardness.

It has been used for many years because of its low cost and natural elasticity. It may be coated with various substances which do not modify its intrinsic properties. It may also be reinforced with a spiral wire to resist crushing and folding.

Latex components

Coloplast hereby confirms that the products listed below contain latex
